Lighted Ear Cures and Tweezers with Magnification

30 MINUTES
Charging time

50 MINUTES
Battery life when fully charged

The LightBeam® ear cures system is intended to aid in the removal of cerumen and foreign objects from the ear canal.

The LightBeam complete kit includes a rechargeable base for the light source, eight different types of curette tips (six each), two tweezers, and a magnifier that fits on the curette. These instruments are all made from clear polycarbonate plastic. The instruments are disposable and intended for single use. All parts are numbered for easy reordering.

- **Easily rechargeable light source**
reduce light source replacement costs
- **Patented threaded curette connection**
no concerns over accidental ejection
- **Innovative and patented tweezer attachment**
- **Eight different curette tips**
- **Competitively priced**
